

Geological Surveys And Investigation Program Have Brought Results

Historic unclassified regions, believed to contain great mineralization in the west and copper-pitchite mineralization and natural gas-petroleum areas in the east have been disclosed this year by the federal \$1,000,000 geological surveys and investigation program, Dr. Charles Camell said at Victoria.

Although the geologic parties have not yet had time to compile their complete reports, the program has been successful in classifying these untraced districts, the deputy minister of mines told delegates at the western meeting of the Canadian Institute of Mining and Metallurgy.

The program, which got under way last June, embodied 65 projects spread over the Yukon, Northwest Territories and every Canadian province with the exception of Prince Edward Island. Close to 1,000 persons were employed in the 188 field parties which engaged on the geological and topographical surveys.

The geological surveys of the YellowKnife river district in the Northwest Territories disclosed approximately 2,000 square miles, or 30 per cent of the area, could be classified as gold producing territory, the deputy minister said.

Another project indicated some 200 square miles in Manitoba could be considered favorable for gold occurrences, and some unexplored areas with similar possibilities were found in Saskatchewan.

The party working in the Cranbrook area of British Columbia found that tests should be made of certain hardy, gold-bearing gravels which have been washed down from the mountains, Dr. Camell said, while examining a mining property in the vicinity of the main line of the Canadian National Railways in the coast province has directed attention to the economic possibilities of the region.

In the east perhaps the finding of copper-nickel mineralization of the Sudbury type in sporadic occurrences over a distance of 14 miles in an area southwest of Fort William, Port Arthur, Ontario, has been the most interesting attainment. In addition, the same project disclosed some 300 square miles favorable to the occurrence of silver.

Surveys of southeastern Ontario indicated additional favorable areas in which to drill for gas, the minister stated.

Solutions of the scarcity of water resources in the west and the north of the southern prairie region of western Canada may hinge upon sources of artesian and ground water, Dr. Charles Camell stated. The prairie water problem was one of the largest mineralized undertakings under the \$1,000,000 federal geological and topographical survey recently concluded.

Nothing would be known, Dr. Camell said, until the various parties had completed their reports.

Alberta Buffalo For Germany

Collection Of Live Moose And Buffalo To Be Shipped Soon

Canada's live moose and buffalo from Alberta and an exhaustive research into the habits, biology and derivation of big game here has been completed by Dr. Luke Heck, director of the Geological Gardens, Berlin. Between 100,000 moose and 18,000 to 20,000 buffalo from Western Alberta will be shipped to Germany to be used for experimental breeding purposes to improve native game, the bases explained.

Protection of big game throughout the world for posterity is sought by Dr. Heck. As soon as his scientific data has been completed and the results analyzed the professor will release the information to the Canadian government, as well as his own government for "their mutual benefit."

Elderly Information Man

Old-Timer Gives Offhand Local Statistics

"Uncle Joe" Ulrich, 92 years a resident of Guyaboo county, N.D., is his district's unofficial "Who's Who." He knows all the old-timers around by name, the first names, knowing their children and their grandchildren. He can give offhand figures, historical dates, dry and wet years and most local statistics.

Now, however, the information is kept anywhere but in "Uncle Joe's" head. He says he thinks about it while he works. And speaking of work, this year he planted and looked after more than five bushels of potatoes and raised four cords of wood.

Maritime Freight Rates

Council Declares Freight Rate Act Is Unconstitutional

Ontario's provincial council, an application before the board of railway commissioners for Canada at Montreal, N.B., created a sensation by flatly declaring the Maritime Freight Rates Act was unconstitutional. The application came from Joseph Sedgwick, K.C., representing the Ontario department of agriculture at the hearing of the maritime transportation commission's application for a reduction in potato rates.

"I am a little afraid to answer my friend's question in this case," said K.C. Halifax, counsel for the commission. "Afraid that if I said what I would like to say I would say too much. So I had better think over what I want to say to say just as quietly as I can. That Ontario is still part of Canada. It is not a foreign country. Heretofore we have had entire sympathy from the great province of Ontario as well as from the province from Quebec in our problems down here."

Mr. Burchell had outlined a claim for extending to the maritime provinces a reduction of three cents a bushel in the freight rate on potatoes imported from potato-growing Ontario and Quebec. The reduction was entered primarily as a test of the validity of section eight of the Maritime Freight Rates Act, which gives the maritimes a statutory advantage of a 20 cent reduction in freight rates. The section provides that this advantage is to be maintained.

Punishment Fits Crime

Sentence Gives Boys By New Jersey

Three 16-year-old boys in Montclair, New Jersey, are going to have plenty of scope to exercise their bent for mechanics in the next year. Following an auto accident they were caught with a .30-06 rifle and a .30-06 pistol painted to look like .30-06 rifles. The boys explained they had an "irresistible impulse toward things mechanical."

The first sentence given to a boy who liked to make silhouette pictures was a good one. The boys will be required to reform school, he sentenced them to spend every Saturday afternoon for the next year in the police garage, where they will wash, grease and help repair the police cars, they will be sorry they stayed so long.

They will be given no chores about washing and greasing a car under police supervision.

The boys cannot pose as bad, bad men. Instead they will be quite chastened. Windsor Daily Star.

The Value Of Experience

Lessons We Can Never Be Set Aside

One thing cannot be forgotten in the writer of a speech and shifting moral ideals that characterize modern thought. That is that the lessons of experience cannot be set aside. The ideals that have emerged through the centuries of human struggle to live free and to practice and abide as the stars by which we determine our calendar and steer our ships. The deep faith in which generations of thoughtful men have found strength and assurance have been converted to a new way of life. All that is required of any man is that he be true to himself, loyal to his obligations, great hearted and kind in his relations with his neighbors—Minneapolis Journal.

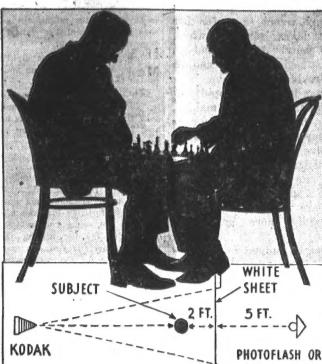

Huge Clock For Airport

The world's largest horizontal clock, which is 30 feet in diameter, will be installed with Big Ben's 22 feet 6 inches in height, at the new terminal to the new Rand airport, South Africa, where it will be visible to aircrafts flying at a height of 3,000 feet.

The longest of all regular English words is "sanitisedestablishmentopposition," which means "a doctrine of opposition to disestablishment."

Sound travels faster in warm weather.

The SNAPSHOT GUILD MAKE A SILHOUETTE

Silhouettes make excellent greeting cards, book plates, and place cards.

With the arrival of cooler days and nights that do not offer much encouragement for outdoor activities, there is a very noticeable increase in interest by amateurs in snapshots in the hours at night.

All of the family, as well as the entire type of snapshots but from which have made silhouette pictures. With this type of picture, even more than with any other, the amateur can be sure that the pictures tell their own story, unless, of course, you want simply a silhouette. In this case, it is better for you have only outlines to work with, unsupported by perspective or detail.

The first essential of silhouette pictures is a perfectly flat background, to obtain which is the easiest way to obtain a sheet of bedsheet to stretch a bedsheet across a chair or table, or lay it flat on the floor in front of the subject. Place your camera on a tripod or table, and, if possible, opposite your subject. When the picture is taken, the light that illuminates the subject should be directed from the side away from the camera, so that the light in either of the rooms.

To light up the background, a strong light must be put in back of the subject, so that it is well illuminated. Using the Photoflood (which gives an instantaneous vivid flash) is the best way to do this. Turn out all room lights, open the shutter, flash the bulb, close the shutter, and you are all set to go.

A little practice with silhouettes is a good idea, and the instructions Good silhouettes make excellent material for greeting cards, book plates, place cards, and so on.

In making them, you can call on your ingenuity and inventiveness into play. JOHN VAN GUILDER.

Not bad, but they will be sorry they stayed so long.

To light up the background, a strong light must be put in back of the subject, so that it is well illuminated. IT MAY BE WRONG.

It is a hard struggle these days to keep a weekly newspaper operating, with the pressure of hard times still exerting itself. So the advertisements of various liquors which newspapers have been running provided a welcome addition to the exchequer.

Premier Aberhart, however, says it is wrong to permit newspapers to run these advertisements and orders that they be discontinued next winter. He says the youth of the province should not be exposed to glaring liquor advertisements.

Maybe the premier is right. If we thought that the liquor advertisements this newspaper has been running would lead one youth astray we would never have inserted them in the paper.

The welfare of a young person is more important than liquor advertising—infinitely so.

But if advertising liquor is wrong, how much more wrong is selling liquor? And if selling liquor is wrong why does the provincial government continue it?

The government says, in effect, we will continue to sell all the liquor people, young and old, will buy, and we will continue to make large profits, while the newspapers must not make any benefits.

This restriction is only confined to Alberta newspapers, for other newspapers carrying all the liquor advertisements will come into the province just the same, and cannot be prevented.

Printed liquor advertisements circulars can be distributed through the mails and the provincial government cannot prevent the act.

There are more ways than one of looking at this question.

JAPAN AND CHINA

Japan and China have been at war on a number of occasions over the centuries with honors equally divided. It is only in comparatively recent years that the Japanese have shown predominance at arms and this was due to the modernization of the nation.

In the second century the Japanese Emperor Jengi successfully invaded Korea, according to tradition. In the eleventh century the first foreign attack on Japan was made by a tribe of Manchurian freebooters. Thereafter Japan was left in peace for two centuries, when she was subjected to two tremendous invasions by the mighty Mongol emperor and warrior, Kublai Khan.

In the sixteenth century Japan went on the offensive and the Shogun Hideyoshi attacked Korea. A potent army was landed and proved victorious in one battle after another. Then a Korean naval genius, Yi-Sun, built a navy which destroyed the Japanese war vessels and swept their transports off the seas, leaving the Japanese armies stranded on the mainland, where they were finally destroyed.

Japan then went into her famous seclusion for two hundred years, being routed therefrom in 1853 by Commodore Perry of the United States. The commodore's country may yet regret the taking of this step for the action aroused Japan into a modernization campaign unequalled in world history. She fought and defeated first China and then the mighty Russian empire. True she did not make any great immediate gains from these victories, but seems to be doing so right now. The present intention obviously amounts to the complete conquest of China. Japan already has Korea, Manchuria and Jehol in the bag and is reaching for five additional North China provinces, which will give her power over another 100 million Chinese. A Japanese empire in complete control of immense China would be a powerful world entity indeed!

ALBERTA HAS A BRIGHT FUTURE

Alberta is a good province. In fact, we believe it is one of the best provinces in all Canada.

It has an area of 255,000 square miles. There are 640 acres to a square mile, so you can figure out the size of Alberta in acres if you are so minded. The area is twice that of Great Britain and Ireland. There are some 46 millions of people in the British Isles and not three-quarter of a million in Alberta.

Alberta is the one Canadian province in which mountain and plain lands meet. It has therefore a topography peculiarly its own. The fertility of the prairies is com-

bined with the scenic grandeur of the mountains.

The fertility of Alberta soil is a matter of common knowledge. The climate is good, although we must admit, in all truthfulness, that it gets cold at times. But the variety offered increases the zest of life.

Alberta has many rivers to water her plains and scores of lakes, some of which possess abundant beauty. Mineral and oil wealth underly vast regions of land and, in the north, forests provide timber.

This great province lacks only population and a diversity of human activity to make it a wonderful place for its inhabitants to dwell. It could support fifty millions of people in comparative abundance.

Youthful in its modern history, Alberta is destined to become one of Canada's leading provinces. She has a splendid future ahead and the passing years will assuredly bring happier and infinitely more prosperous times.

Alberta should not be judged by the dismal record of the past few years, but by the possibilities of a glorious future.

WARS GOLDEN HARVEST

"The world war was a golden harvest for our people; a get-rich-quick chance not to be neglected. The general feeling of traders was expressed by a remark overheard in New York at the time: If this war will only last another year, I will be a millionaire. As a neutral we claim the freedom of the seas—the right to trade with all belligerents and neutrals . . . We made this claim because we wanted the enormous profits of such a trade. All this neutral trade was under the protection of our government . . . One way to strike at this war cause and therefore strengthen the possibilities for peace, would be for congress to declare that all trade is contraband, and that no compensation for loss by action of belligerents would be demanded by our government . . . The individual trader, out for huge war profits, would have to bear the risk himself . . . We cannot keep out of war and at the same time enforce the freedom of the seas—that is, the freedom to make profits out of countries in a death struggle."—Rear Admiral William S. Sims.

FLOCK SHOTS*

The open season on antelope has come and gone.

Until yesterday it has been a familiar sight here and in surrounding districts to see the hunters pour in, dressed in their colorful "war togs" and bent on a day or two of sport.

We have seen them come in anticipatory eagerness and we have seen them proudly return with the quota strapped to their cars.

It has been a great season and we hope that every last one of the visitors had his share of luck. It's great sport and we like it and hope they will come again next season.

An open season on antelope is new in recent years, and they have multiplied until their inroads on domestic stock feed reached serious proportions. So serious in fact that after the regular season closed this year the farmers and ranchers of Southern Alberta petitioned and were granted an extension of the period—open to all, to anyone who could buy a licence and had a gun.

All this is as it should be, but we feel that we must protest a practice of which real hunters and lovers of hunting would never dream of countenancing: The cruel and inhuman practice of careless hunters in wounding one of the beasts and not making every effort to track down and mercifully kill it rather than let it die a lingering death of wounds or, as more often happens, let it become a prey of coyotes when too weak to run.

Only the thoughtless do things like that. Now, we can't pretend that it is only the visitors who are guilty of this crime against the laws of good sportsmanship and humanity. Our own ranchers, farmers and townsmen are not excepted. We protest against anyone—no matter who he is or where he comes from—making "flock shots," which, for the benefit of the uninitiated, is blind and indiscriminate firing into a band and picking up what chance brings down, leaving the wounded to run, as they usually do, for several miles, and die days later.

And this is no exaggeration. One rancher alone in Lethbridge district found three dead of wounds and scavenging coyotes on his place. Others have reported more and others have reported less. The number can only be guessed at, but those who should know seriously claim that for every one of these animals bagged and taken home, one dies a lingering death of its wounds.

So we make a plea to all sportsmen: Don't flock shoot—and trail down your wounded.

**Ten Minutes
with the
Scotch Philosopher**

One aged farmer we know of spent 15 minutes telling one of his boys how he wanted certain chores done in the morning.

Then, refreshed by his night's repose, he arose with his tools and proceeded to do his chores.

Now he is complaining that he has to take a considerable amount of chaff from the members of his household to burn for so many uses. But hasn't he got some of it coming?

Surprise! He hasn't.

As we sat down the radio last night to get ready for bed, we heard strange music outdoors and immediately went forth to investigate.

It was the young cockerel justly entitled to the name of "Cocky." When he was not Old Bill this morning and told him of the occurrence, he quickly exclaimed: "Man, man, that means a big rain in six months time." Check up on his prophecy, some of you may say, and you will find no reason to doubt his forecast of the weather.

Bill is far more reliable than the highly paid government officials who tell of light breezes when ferocious halstorms are getting ready to blow over chicken coops and hog pens.

By the way, men, ever hear of the far-famed Chinese magician known as Ching Ling Soo?

Well, his real name was William T. Clegg, and he was a master of "flock shots." First saw the light of day in the "land of Burns and Scott."

The passing of a noted man who, while not a伟人, was a distinguished and rather rare man who faces the long drawn features of cancer, has again brought to the fore the old and oft-discussed subject of euthanasia. Many of those who oppose the swift and merciful end of hopeless incurables present arguments which, while reasonable, are, however, enlarge far too much the benefits derived from the use of X-ray, radium and morphine, especially in cancerous cases.

The first two are beyond all except the well-to-do, and therefore cannot be recommended as a remedy for or against euthanasia.

On the other hand, the prolonged use of morphine frequently leads to lamentable results. In course of time the patient becomes wholly dependent on the drug and, with the nervous system nearly destroyed, the sufferings increase until death finally steps in.

Medical men the world over are now engaged in discussing ways and means to shorten the lives of incurable pain but pain from the cruel tortures, but with the church strongly arrayed against them, progress is bound to be slow.

Meanwhile, it will interest many people to learn, one African tribe practices a form of cannibalism and rather peculiar fashion. When one of their number was mortally wounded in battle, or rendered by other circumstances unable to take care of

himself, he was carried by his friends to a high point overlooking some water.

Food and shelter were provided until the sick man grew tired of life. Then, in his own accord, he went rolling down into the crocodile-haunted pools below.

"Oh, Constance, thou art a jewel!"

Scarred three years have passed since Signor Mussolini made a nation wide appeal to the women of Italy to have more children.

The reason given on that occasion was that the country needed many more to make it a powerful nation.

Now, he and his ambassadors abroad are telling the whole world that Italy must have more territory (meaning Ethiopia) to enable the race to fulfil its prime destiny.

Another instance of the wayward nature of man can be found in the attitude of Father Coughlin, the Canadian born leader of a new social movement in the U.S.A.

Profiting to a deep hatred for war and to human ways, he looks on the leadership of Britain in the councils of the League of Nations as the work of the devil.

Unable to find words of our own suitable for the occasion, we pass along the following, which came from the pen of a sturdy Australian youth who plucked his wisdom along the barren shores of the Gallipoli, and in the hell created by man down in the valleys of the River Somme:

"The persons pray for wars to cease."

With the Boy Scouts

Next Scout Jamboree the Fifth

The World Boy Scout Jamboree announced to be held in Holland in 1937 will be the fifth of these great international youth gatherings. The first was in London, in 1920, the second at Copenhagen, in 1923, the third at Birkenhead, England, in 1929, and the fourth at Geddelo, near Budapest, Hungary, in 1933.

A recent gift from New Brunswick to a Boy Scout troop in Scotland that deserves to be appreciated was a simple but elegant and becoming dress, including the feather headdress, made by Chief Patchie, his wife and daughter, on the Klangas Reserve. The dress was the gift of Mrs. H. N. Stetson, daughter of Maj. Gen. H. N. Stetson, V.D., former commanding general of the Canadian Regulars.

During the summer Mrs. Stetson and her daughter visited a Scout Jamboree in Scotland, and were much impressed with the work of the boys.

"In these times I do not think there is any other movement that has greater possibility for good than the Boy Scout movement,"—Sir Frank B. Flood, British High Commissioner in Canada.

Never mind never ends. Even in peace we need police to save us from our friends; We go to church to seek for grace and then come out to sin. I wonder if the human race was ever meant to win."

**Good Wines . . .
FOR GOOD TIMES**

How much good cheer a glass of mellow wine adds to any meal . . . yet the pleasant touch of good wine costs so little . . . Bright's Wines are so fine in quality that cultivated tastes can enjoy them so low in price that the most modest income can afford them.

Board of Trade Requests
Government to Maintain
Local 'Distributors' Here

Special Fares

Especially reduced fares for Christmas and New Year's between all stations will be offered by the Canadian Pacific railway, according to information given by Mr. H. Beecher, local

Bassano, Alberta,
29th November, 1935.

WHEREAS it has been reported in the public press that the Provincial Government intends changing the system of beer distribution throughout the Province;

AND WHEREAS the Executive of the Bassano Board of Trade is under the impression from the reports contained in the public press that such a change would be to the detriment of the Distributors Limited

AND WHEREAS this warehouse is in a very large territory lying between the City of Medicine Hat and Calgary, and has been of great assistance in the distribution of beer to return passengers at Bassano to serve the said area.

BASSANO BOARD OF TRADE

Gasoline Tax Act

In Alta. Contested

The Fuel Oil or gasoline tax in Alberta is being challenged on the grounds that it is unconstitutional inasmuch as it is legislation which seeks to impose a tax on the citizens of Alberta, whereas it is an indirect tax on citizens of gasoline who serve as agents for the government in the collection of tax from their customers.

At the present time, a seven cent tax on gasoline is collected from motorists using fuel in Alberta. Since the tax was introduced in 1922, a total of \$17,392,965 has been collected.

Most of all, the dominion has a direct interest in the outcome of this action, as it would affect the right to collect this tax and it is considered likely that the rights of other governments could also be challenged if the appeal is successful.

Making "Good Scouts" of Hawks

An attempt to train three young hawks to be "good citizens" has been made. Farmer's chicken coop is the reported effort of three Boy Scouts of Gorham, Maine. During a summer camp hike the boys came upon the young hawks, apparently abandoned by their parents. In variance with their reputation, the birds made friendly nests.

COMING TO TOWN

Robert Pike, President of the Columbia School of Aeronautics at Vancouver is making a tour of the Western Provinces for the purpose of opening a branch of his school in each of the most important airports for aviation training, before the Trans-Canada route is open. All applicants who are chosen will receive their first lesson in the air in the Waco bi-plane piloted by Eric DePelder. After completion of the course, the students will be sent to the school which will have their railway line furnished to Vancouver in order that they might continue their practical training in the shop at Vancouver. Columbia has 100 students. The school is the largest aviation training institute in Canada and is fully equipped to train both pilots and Air Engineers.

A complete motion picture of airports and training school operations may be viewed without obligation by arranging an appointment with the Columbia School of Aeronautics, 1000 Columbia Street, Vancouver, B. C. Prospective students are especially requested to look into the opportunities available and qualifications required in the various branches of aeronautics before deciding upon one branch of study. The president of the school, Robert Pike, emphasizes the importance of getting into the air as soon as possible for the aviation industry in the future will be the greatest employer of men. He claims that the aircraft industry offers greater opportunities to young ambitious men than any other industry in Canada at the present time, and for some considerable time to the future.

WORLD HAPPENINGS
BRIEFLY TOLD

The Irish Free State formally accepted the British invitation to attend an international naval conference in London.

The Queen Mary will begin her maiden voyage from the Clyde to Southampton on March 23.

King Ibn Saud and his government were determined Arabia should observe the Sabbath, so they closed the Suez Canal to British shipping. The British, however, refused to export camels and sheep to Italy despite the high prices offered.

The Nobie company decided that no peace prize would be awarded for 1930, but the United States Secretary of State, Cordell Hull, was warmly mentioned for the prize, as was Emperor Haile Selassie of Ethiopia.

A dust storm bugaboo last spring of the southwestern grain lands was reported recently at Liberal and Emporia in southern Kansas and in parts of the Oklahoma and Texas panhandles. Dust clouds blotted half over Dodge City.

Depression has brought at least one benefit, a remarkable growth of literature on the art of bookbinding. New Zealand parliamentary secretary, He said in Winnipeg it had been one of the greatest blessings of the past few years.

Lieut.-Col. J. Birdwhistle, secretary of the Dominion Booksellers' Association, announced Baron Tweedsmuir had accepted the office of patron of the association during his term of office as governor-general.

Dr. Hermann Görtz, a German, was arrested at Hawick, England, authorities announced, charged under the Official Secrets Act. The Official Secrets Act is applied in cases where a leakage of secret information is suspected.

Old Spinning Wheel

In Perfect Condition Still Turns Out Good Homespun Cloth

In perfect condition and still able to turn out as good a quality of homespun cloth as the day it was built a spinning wheel more than 100 years old is in the possession of Mrs. Jessie McPhee, of Newmarket, N.Y.

Of small size and well carries the Scotch manufacturer's name as "Alex Macintosh, built in 1818." Mrs. Poiter has used it continuously for 22 years, and to her ownership it was used by her great-great-grandmother, McPhee of Grand Mere, who used it from 1875 to 1910. The wheel is stated to be good and light as well as strong and fast and the present owner could not be induced to part with it at any price.

Gold Production

In the first eight months of this year Canada's gold production amounted to 2,097 ounces while the output in August set a new high monthly record when 294,361 ounces were produced. During September Manitoba and Saskatchewan accounted for an output of 13,583 ounces.

It is expected that 120 athletes will represent the Dominion of Canada at the Olympic games in Berlin, August 1 to 16, 1936.

A few drops of kerosene added to water makes an excellent wash for windows, mirrors and picture glass.

City Built In Three Months

Turkish Dictator Wants 300 People
To Lead Outdoor Lives

"Build a city by the sea, near Istanbul, where the masses may go and enjoy themselves. It must be finished in three months. It must be a hotel, a casino, a bathing beach. It must have all other attractions of a first-class watering place. It must be a national playground for the people."

Turkish dictator, Kemal Ataturk, formerly Mustapha Kemal, gave these orders to the mayor of Istanbul. The masses put 8,000 men on the job. Within three months to a day the seaside city sprang up.

It is called Florya. It is on the European side of the Sea of Marmara, about 30 miles from Istanbul. It is the Turkish version of Monte Carlo, minus the gambling. The first one to plan it, however, was Kemal, as an example. He wants to free the people from centuries of traditions, from latticed windows and harem. He wants them to lead outdoor lives like Americans and Europeans.

Gold Production In B.C.

Is Expected To Reach Value Of \$45,000,000 For Year

British Columbia metals and minerals have added \$17,000,000 to the amount of production in the last three years, and are expected to add \$16,000,000 this year, compared with little more than \$26,000,000 in 1932, or a gain of some 62 per cent.

This is conceded by British Columbia mines officials, who added 11,000,000 in 1932, and 10,000,000 in 1933, to record gold recoveries in the first nine months of the current year.

British Columbia gold production is now running at the rate of \$1,000,000 a month, with an loss of \$12,000,000 in the first nine months of the expected total for the year.

This compares with gold production which brought producers on B.C. properties, but \$3,250,000 in 1929, and marks the greatest single change in the mining industry within the province.

Londoners Had Thrill

Subway House Lives Used In Milk Campaign

A Londoner can buy a milk station is as easy thing even in the metropolis of London where anything may happen without causing undue excitement.

People arriving at Charing Cross subway station will find themselves and church parades, and the lengthening shadows of winter nights cause men of 40 to 45 to reminisce over the days of Ypres, Picard Street, Vimy, Arras and Mont.

When they get to the milk station, as these men are wont to do, they always speak with lasting affection of the Dumbells, and that naturally brings up the name Ben Allen, and then follows the thoughts:

"Ben is organized, Ben is a good Canadian Legion, Ben is a British Empire Service League, which takes place in July of next year."

So your reporter, who is of the class of 1914-1918, calls on Captain Allen, who is in charge of the Canadian Legion, 100 Queen Street, Ottawa, and finds him up to his ears in executive work.

"This Pilgrimage," says Captain Allen, "is going to be the Pilgrimage of Pilgrims. Up to Monday, November 11th, over 2,000 applicants have been received and approved here at headquarters."

The Canadian White Star Line state that this advance registration is the largest in the history of shipping.

Headquarters in France has already made advance bidding accommodation for five thousand people.

"This Pilgrimage is of great spiritual significance," says Captain Allen.

"But with the solemnity of the occasion, there will be great fun to be had by all. I am sure the applicants are a lot of professionals and amateur boatmen, because, so we will have some grand concerts and parties."

Our leading spiritual adviser is of course Canon Scott, who is listed as the chaplain of the Canadian Legion.

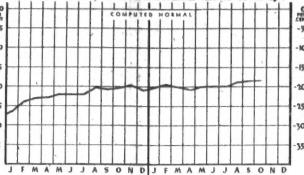

In addition to the unveiling of the Canadian War Memorial at Vimy, there will be a grand torchlight procession at the cenotaph in London. Many thousands of ex-servicemen, from the Canadian Legion for the ceremony at Vimy Ridge, and arrangements are now being concluded with the Canadian Patriotic Company for an Empire broadsheet of the great occasion.

"Our great fear at present is that under the existing conditions made many thousands of ex-service men and their relatives who may wish to go to France will not be able to find accommodation if they wish to remain there until the completion of their pilgrimage two long."

BUSINESS IN CANADA

MONTHLY INDEX OF CANADIAN BUSINESS CONDITIONS
(ADJUSTED FOR LONG-TIME AND SEASONAL VARIATIONS)

COPYRIGHT-McCALL, BAXTER & EASTMAN LTD., RESEARCH DEPARTMENT

Business in Canada during the month of October showed a fractional gain over the month previous according to the McConnell, Baxter & Eastman monthly index. The preliminary figure was 18.6 per cent below normal. Revised data for the previous month showed conditions at 18.8 per cent below normal. A year ago conditions were 21.1 per cent under par.

Gains were recorded by two fac-

tors, revenue freight loadings, one tenth point and construction contracts awards, up 1.1 points. Bank debts exceeded one tenth point and electric energy output was down a similar amount.

The combined index shows a gain of nearly ten points, or 13.4 per cent, October 1934 over the previous month. Revised data for the previous month showed conditions at 18.8 per cent below normal. A year ago conditions were 21.1 per cent under par.

Gains were recorded by two fac-

tors, revenue freight loadings, one tenth point and construction contracts awards, up 1.1 points. Bank debts exceeded one tenth point and electric energy output was down a similar amount.

The combined index shows a gain of nearly ten points, or 13.4 per cent, October 1934 over the previous month. Revised data for the previous month showed conditions at 18.8 per cent below normal. A year ago conditions were 21.1 per cent under par.

Gains were recorded by two fac-

tors, revenue freight loadings, one tenth point and construction contracts awards, up 1.1 points. Bank debts exceeded one tenth point and electric energy output was down a similar amount.

The combined index shows a gain of nearly ten points, or 13.4 per cent, October 1934 over the previous month. Revised data for the previous month showed conditions at 18.8 per cent below normal. A year ago conditions were 21.1 per cent under par.

Don't Guess But Know

Whether the "Pain" Remedy You Use is SAFE?

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

THE person to ask whether the preparation you or your family takes for the relief of headaches is SAFE to use regularly is your family doctor. Let him particularly about "ASPIRIN."

Will tell you that before the discovery of "Aspirin" most "pains" remedies were adverse against being physicians as bad for the head is and, often, for the heart. Which is good for thought if you seek quick safe relief.

Statistics rate "Aspirin" among the fastest methods yet discovered for the relief of headaches and the pains of rheumatism, neuralgia, and gastritis. And the experience of millions of users has proved it safe for the average person to use regularly. *In your own interest remember this.*

"Aspirin," taken in Canada, "Anadin" is the registered trade-mark of the Bayer Company Limited. Look for the name Bayer in the form of a cross on every tablet.

CHAPTER XXIV.—Continued

The girl spoke softly, her dimples showing for a moment, but to her surprise Jack answered in all seriousness: "After what you did during the blizzard? You know better, sis. But Matt's different from some boys, and I didn't like to think you'd hurt him."

Sad Nancy, endeavoring to make her voice sound light, "You talk like Aunt Judy! She imagines that every boy who looks my way has lost his heart."

"Well," observed Jack, "most any one would think that Matt had; but I never saw him act so happy and keyed up as he did this evening and last night too. Say, will you ever get him to tell us what Matt was over your finding that crucifix? I think they're the finest family I ever knew, Nancy. So enthusiastic all of 'em. Do you suppose David Morris will let us come back next winter?" With Mark in California studying forestry they'll be short of help here at the ranch; and gee! I'd like it more's anything!"

"I say a good word for you, pneumonia's his sister; and then he's off to bed. Jack, I must be up in good season, and it's a long pull, not right."

Despite her next awakening was up early next morning, Nancy did not know. Something tightened in Nancy's throat. The landscape blurred. Then Jack was saying:

"Dear Matt, She forgot to tell you about her son for Cousin Columbine to know. Something tightened in Nancy's throat. The landscape blurred. Then Jack was saying:

"I say, between that's over! I never feel so... so conspicuous in my life. Did you know every member of the Adam family? I don't but I did! I sure I kiss Juanita Tubbs—by mistake, of course. And I believe I'll kiss her again. I'll kiss her again three times! Not she the dumb old sport, Nancy? Kept a stiff upper lip to the last minute, but I miss my guess if she didn't want to. Walk. Made me feel just to look at her. But some one will understand and care for her. For once somebody will!"

Jack was right. As the wheels moved faster and Miss Columbine's steady lip began to tremble, a first young hand drew her away, back from the crowd that still stared, stupidly, it seemed, at the departing train.

"Listen," said Matthew. "Li-li-teen, Miss Columbine. It's not quite so awful as it seems, having a son. I'll tell her all about it even. Mother in—Ull Nancy got home and could tell her all; but she left a note for you in—in case you seemed too lonely; and anyway, I'll probably explode if I tell 'em all one, so—no, I'll just say—"

This was the old, shy Matthew, hesitating as if there were no words with which to say this thing; but as she glanced up, puzzled, Columbine Nelson surprised a light upon her face that started her. "Well named 'King of Pain'."

"What are you trying to tell me,

gates?" I'll have to admit that for a fellow who's sweet on a girl that's goin' two thousand miles away where he'll likely never lay eyes on her again, Matthew Adam looked pretty well resigned. And not more'n three days ago he resembled a man just come from the hospital after burrin' his last relation. He's to drive the Ford with his father and mother and Miss Columbine and you, Nancy. I doubt if I want't quite so fleshly as square as between on the front seat and go to town."

"Why not go down on the truck?" suggested Miss Columbine, emerging from her bedroom.

"Ain't all them trucks and young folk that can't get away from a good woman?" "No, thank you, Miss Columbine. I have my pride, and there's house cleanin' to do even if you are going home with Eve Adams for the Shadway. I must say it was real considerin' of Eve to ask me in for this house! I see about as cheerful as the tomb till we get used to it. Well" (she sighed mournfully), "the last breakfast is ready, and you'd better eat now. My appetites, when I have 'em, are appetites, and four doughnuts was all I could get down this mornin'. I've took the liberty of invitin' Victor Tubbs to dinner, Miss Columbine. I need food, and goodness know I don't eat."

The truck was gone at last, leavin' Aurora flattered and at Jack's farewell kiss.

"It's just as well," she said, wavin' her apron as a last salute, "that you want to go away. I'm not jealous. Nancy, I am more than 20 years of married life; and though Jack didn't mean nothin' in the world by kissin' me good-bye, Victor Tubbs might have misunderstood."

"I am sure that there's no fool like old fashioned Miss Columbine to tarty! Here comes the Ford, Aurora. I'd rather have Mark Adam drive us down the pass, but no doubt Matthew will be careful with his load of old folks. Where are we goin'?"

"I am at the reoccupation of her home with Mark. I think he's in the face and eyes of an astonished baggage-man, he caught the oddly-attired lady in a hairy little hug.

"Only that Nancy is coming back," he told her joyously. "And—next time, Miss Columbine, she'll come to stay."

The End.

Local and Personal News

W. J. Gibbs of Gem is now the mechanic in the Texaco garage.

Mr. C. Hanna of Gem was the guest of Mr. and Mrs. L. Newby last week-end.

Wm. Schwartz of Calgary, director of the National Food Products, was in town on business during the week.

Mrs. W. F. Keith and children have returned home from Calgary, where they had spent the past few weeks.

L. N. Clark and L. Woodford of Huscar were business callers in Bassano on Friday, and welcome visitors at the Mail office.

W. G. Caine, M.L.A., of Brooks, was in Bassano on Wednesday and attended the board of trade's luncheon meeting as a guest.

Roy Smith was in the city last week-end where he delivered two new Ford's, to Mr. B. A. Ol' and C. G. of the City of Hussar.

Charlie Longmate, Ford dealer from Drumheller, was in Bassano last week and purchased seven used cars from Roy Smith, local dealer.

Mrs. J. M. Wheately of Chancellor is spending a few days at the home of Mr. and Mrs. Bill Plumer. The latter were callers in Chancellor last Tuesday.

Miss Bonita Johnson and Alf Turlock won the spot dance at the Junior Hockey dance last Friday; Miss Jean Plumer and Carlyle England were the winners of the prize waltz.

Bassano W. I. Notes

The annual meeting of the Bassano Women's Institute was held at the home of Mrs. G. Morrison on Tuesday afternoon, December 10. The various reports of the officers showed that the Institute had had a very creditable amount of work during the year and all were very pleased with the whole-hearted co-operation of the members in all activities.

The following officers were elected for 1926: President, Mrs. H. D. Edwards; Vice-President, Mrs. H. Edwards; secretary-treasurer, Mrs. E. Corbett; executive committee, Mrs. G. Morrison, Mrs. G. McIntosh, Mrs. F. Pragall; auditors, Mrs. A. Cador and Mrs. I. Hefflebower.

The next regular meeting will be held in the home of Mrs. E. Corbett on January 7 at 8 p.m.

Danish Aid Meets

(Special to The Mail)

CHANCELLOR, Dec. 10. — The

Chancery Danish Aid's meeting at

Tuesday, "The Home of

Mrs. Nels Nelson, their meeting

present 25 members and visitors.

This occasion Rev. and Mrs. Beck of

Chancery received a generous gift of

money as an expression of appreciation

for their services in this organization.

At the close of the meeting

a very dainty luncheon was served

by the hostess.

"Excelsior" Form

(Special to The Mail)

GEM, Dec. 10. — Twenty-one mem-

bers were present at a very suc-

cessful meeting of the young people on

Saturday night. It was decided by

the members to have a "Young Peo-

ple's Excelsior" and arrangements

were made to provide programs and lunch

for all meetings. The next meeting

will be held on December 30 at a

place to be announced later by the

executive.

"Holiday Dance" Jan. 3

A huge New Year's gift box, which

will contain over 1000 items, will

be raffled at the dance in Gorm on

January 3. The dance is under the

auspices of the R.C. Ladies and is

convened by Mrs. T. L. Maguire.

Yuletide novelties will be the draw-

ing card of the festival; there will

be a door prize, balloon and hat

prizes, and a special door prize

lunch will be served at a moderate

price. A good time is promised all;

music by a snappy five-piece or-

chestra.

to you and also to the public . . .

So Albert F. Calbeck until Xmas

to see Santa, but drove to Calgary

a couple weeks ago to see him . . .

J. F. Royer explaining to a small
